
ACTIVITY POLICY OF THE GAMING INDUSTRY INBOUND UNION

We are primarily intended to work on a wide variety of businesses for the purpose of the Japanese pinball, or Pachinko Pachislot getting more and more close to foreigners not only Japanese, and healthy development of the business.

The number of the foreigners who visit Japan in these days is 19,730,000 this year.
On a single month basis, March and April 2016 recorded more than 2,000,000 people.
This number
will be expected to still keep developing until Tokyo Olympic Games in four years later.

Japan also reinforces the budget every year, and call in foreigners focusing in the business which is called "Visit Japan".

While economy is reducing gently of Japan where the declining birthrate and a growing proportion of elderly people are developed, we have to make more effort on sightseeing industry and have them drop the foreign currency.

The important thing is Japan inform foreigners more and more that Japan has lots of lots of offer and get them to visit and have a good time in this country. We seriously hope foreigner become our country's biggest fan. There are long cultures, on the other hand, there are pop cultures, and activities. It'll be enough of attracting people. And also undeveloped industries exist in Japan.

"JAPAN, ENDLESS DISCOVERY"

never ending seeking and discovery, Japan puts up indicate this thing, and it indicates that Japan is the place no matter how many times visit, who can have fun.

Pinball culture is one of "the pleasure" which isn't learned about by a foreigner yet surely. Even if we know existence, that which can't arrive until an amusement is the current state.

To make undeveloped this culture and market evolve to a foreigner, we're sirs.

We take hand, and we have to use with a hand at all Japan. An inn bound is kyou.

An art is the most critical item to success, and that's proved to the world already in Japan.

A pinball pinball-style slot machine is Japanese culture as public amusement. Make continue this eternally.

The intelligence of the partner individual is also collected in RUTA US, and it's in sending to the world and improvement of the economic position.

We'd like to do our best.
